FMC Covid 19 Update

With the ever-changing global situation in relation to the novel coronavirus outbreak FMC is working diligently to ensure the safety of its employees, partners and customers.

Over the last several months, FMC has been meticulously following the UK Government's advice, to ensure compliance to all social distancing measures and therefore allowing not only production to be fully maintained in the factory, but also full capabilities in the warehouse with increased stock levels to meet customer demands.

Moving forward we will continue to monitor the situation carefully and follow all Government and WHO guidelines.

We would like to take this opportunity to thank all of our customers and partners and we look forward to supporting you throughout these difficult times.
