

# Why FMC ?

## Your choice for Mining Brakes

FMC is the brake supplier of choice in the mining industry. Over the past 25 years, FMC has built up a vast range of parts, developed through many years of research, generated from our expertise and dedication, our understating of business solutions and precision engineering. Recently the introduction of our own Advanced Friction Paper (AFP), a man-made fibre with a stable braking power, together with superior engagement, has created a shift in the industry by more than doubling the life of a brake using standard friction paper. This makes FMC the correct choice for your wet friction needs.

AFP has been extensively tested in many machines World-Wide, giving significantly improved life over Standard Paper, and similar life to Carbon Paper, between 50% and 75% times the life.

Our customer feedback surveys continually show that we are better than the OEMs and our nearest competitors for Price, Lead Time, Quality and Life of product.

**For more information please consult our extensive catalogue or our website.**
